

Summer 2019 Street Projects

In addition to the projects below, street crews will be fixing potholes throughout the City all summer long.

Crack Seal Work

The crack seal and chip seal coatings are maintenance items that will continue through the life of a roadway until the surface requires a mill and asphalt overlay. Crack seal work will commence on May 21st and continue through May 23rd, weather permitting. Roads that will be sealed are: Colorado Court, Defiance Avenue, 4th Street, Echo Street, Cardiff Bridge Road, Rock Ledge, Soccerfield Road, 14th Street, Sky Ranch Drive, Colorow Road, Ouray Road, 29th Street, Sopris Avenue, 19th Street, 23rd Street (Blake to Palmer), Crestwood Drive, and Walz Avenue. Some of these streets are crack refills from last year's chip seal projects; some are newer roadways receiving their first round of maintenance to keep them in good shape.

Chip Seal Work

A schedule for chip and seal work has not been determined at this time but will be completed by the end of the summer. The roadways that will be chip sealed are: Blake Avenue (7th to 13th), Bennett Avenue (7th to 13th), Palmer Avenue (7th to 12th), Bennett Avenue (21st to 23rd), and Pitkin Avenue (8th to 14th). These streets were crack sealed last year or partially milled and overlaid with asphalt. This year the Streets Department will be milling out bad spots in the roads prior to chip seal starting, creating a smooth surface and filling in larger cracks/potholes so the chip seal surface will last for a long time.

Mill and Asphalt Overlay Work

The asphalt projects this summer range from water and electric line repair areas to resurfacing the Midland Bridge deck at Exit 114. Asphalt work this summer will be all over the city. The list below includes the locations and the project reasoning for the 2019 repairs. Asphalt projects anticipated for 2019: 7th Street in front of the Hotel Denver (electric system work), 7th Street and Blake intersection (electric system work), 13th Street from Grand Avenue to Cooper Avenue (waterline repair), intersection of 7th Street and Colorado Avenue, 27th Street from new roundabout to Highway 82, Stone Ridge Court, intersection of Wulfsohn Road and Market Street, and Midland Bridge deck repairs.

South Midland

The City is also going to complete a temporary repair of South Midland to get the roadway through the summer of 2019 and winter of 2019/2020 until the full repair and reconstruction of South Midland begins in 2020. The asphalt put down along South Midland this summer will be reclaimed when the main project starts and reused as a hot mix in other areas of the city with the City's new pothole trailer.

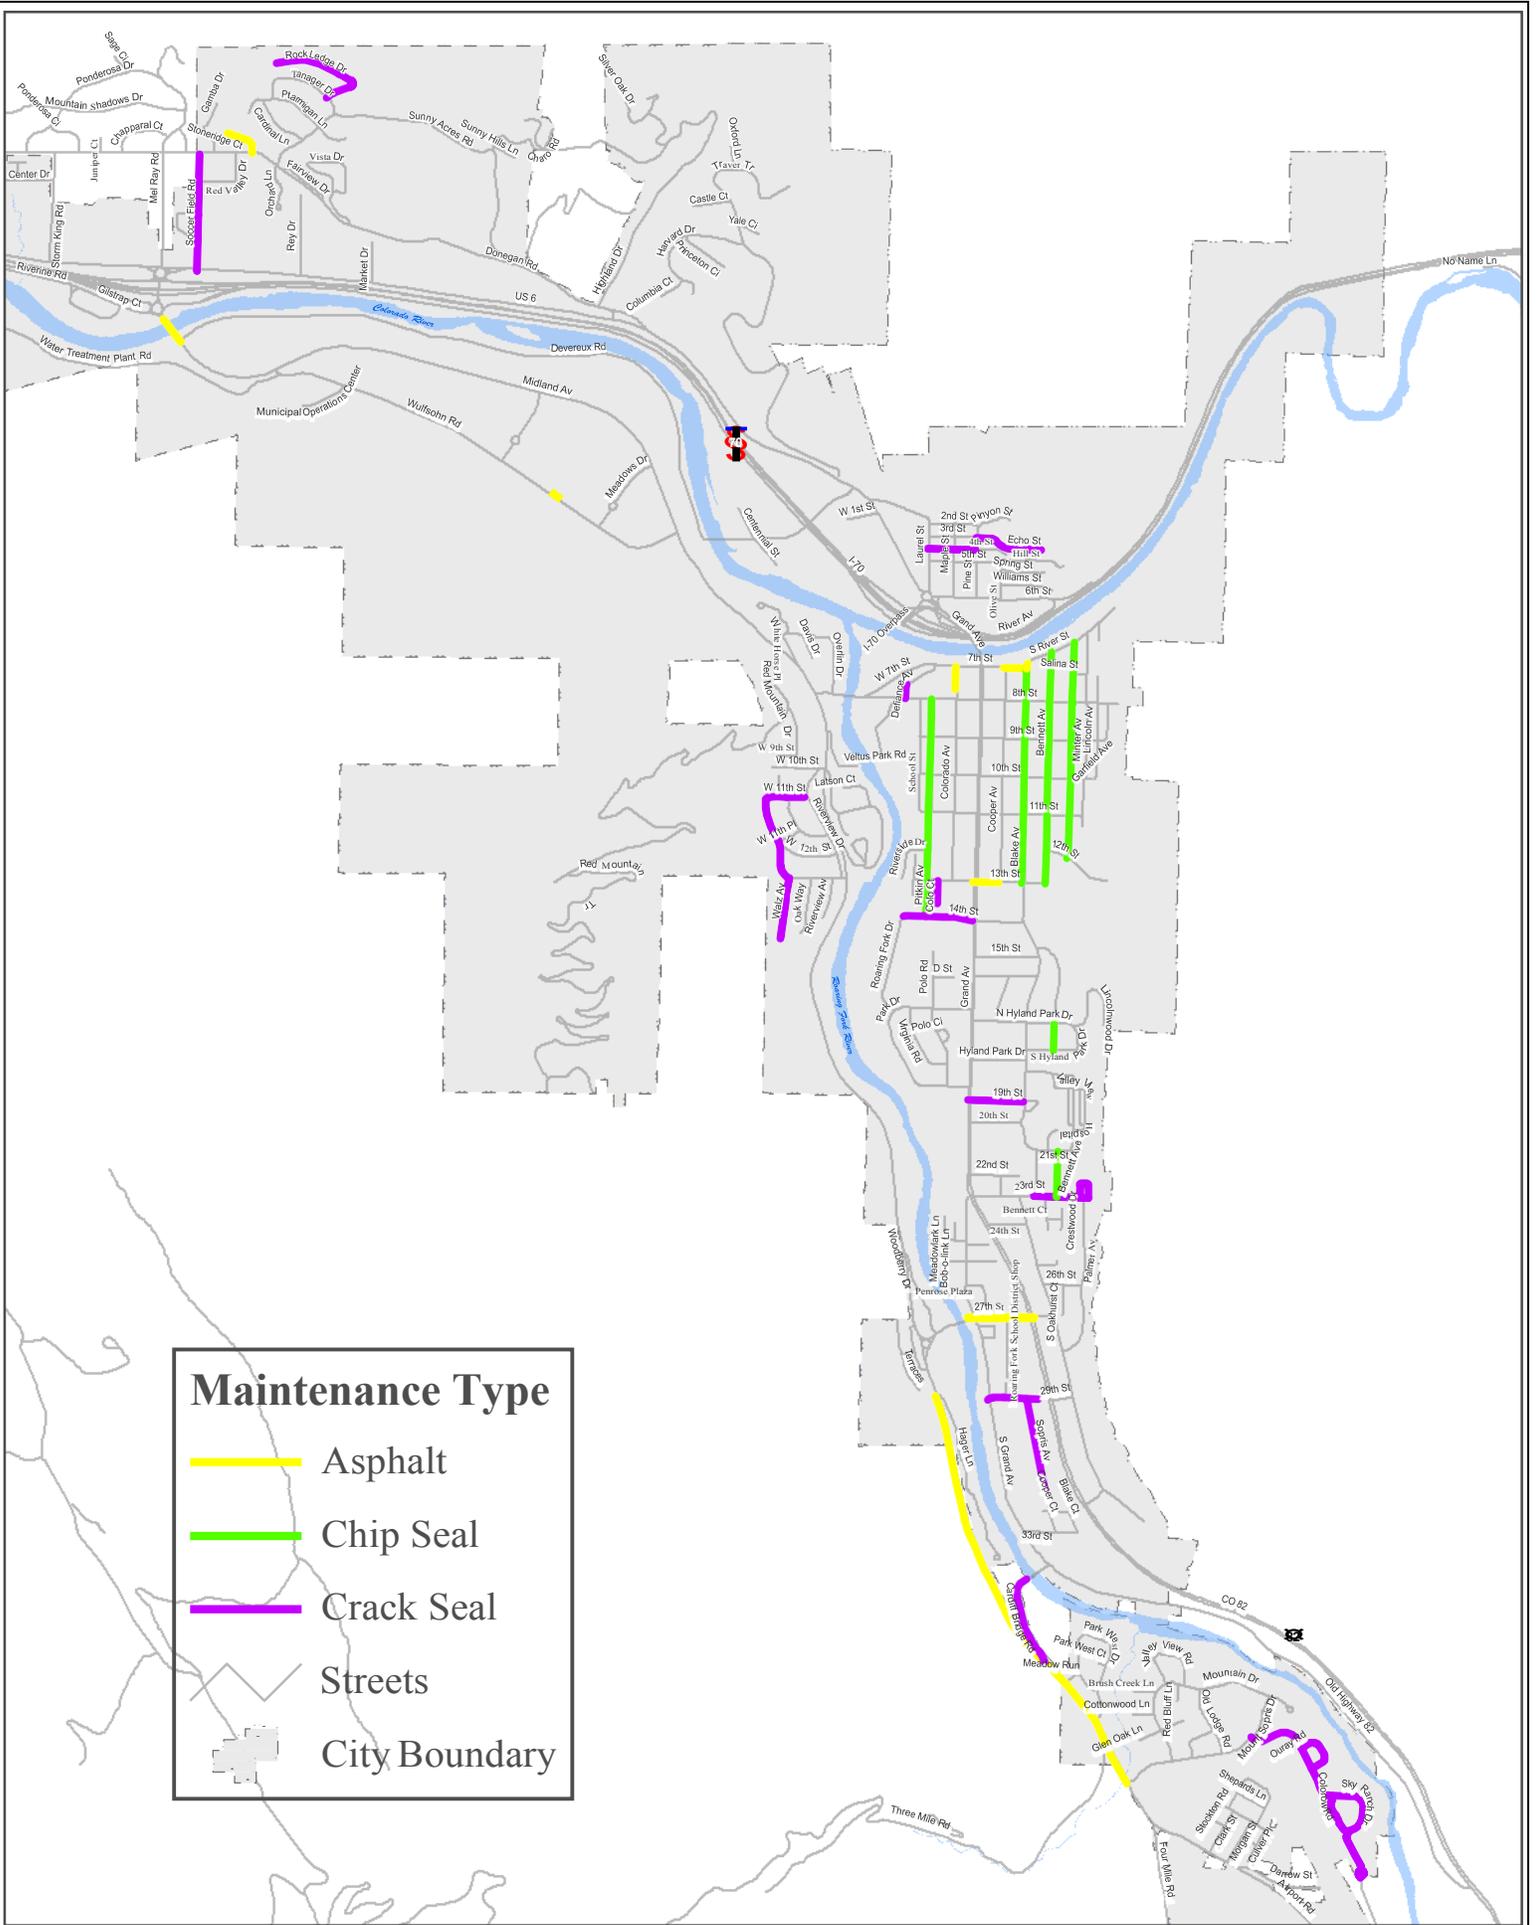

Additional Streets and City Projects

Storm inlet and pipe replacement at 7th Street and Bennett Avenue, drainage work at Lincolnwood and North Hyland Drive, city-wide sidewalk panels and handicapped ramp repairs and replacements, HWY 6 & 24 bike path repairs, Midland Avenue stormwater ditch from Mount Sopris Drive to Exit 114, Wulfsohn Road asphalt repairs as funds allow.

Public works projects in design and/or ready and awaiting funding: North Red Mountain Drive, Cedar Crest Subdivision, South Red Mountain Drive area, and Blake Avenue (23rd to 27th) if funds allow.
